## Protocol of testing the device for development of concentration

### PRK-1U. Distance test.

Test is conducted by the citizen of the state of:

Norway. (for the time being living in Sweden)

---

### Description of device

Development of concentrations providing eternal life for all is carried out by the concentration of attention on the receiver of generated bio-signal and in the same time control for achieving result of the concentrations. It is known in psychology that the longer the concentration is carried out, the faster the goal is achieved, and the events are optimized. The device, in addition to this factor of psychology, according to the law of universal connections has a control of the goal of concentration through superposition of the fields from generation of the bio-signal, electromagnetic fields. The device develops concentrations of creative control.

The device has been created by Grigori Grabovoi on the bases on his two currently effective patented inventions: "Method of prevention of catastrophes and the device for its realization" and "Information transmission system".

In the patent "Information transmission system" has been written that it is known in the theory of wave synthesis that a thought generated emission may exist in two quantum

states simultaneously. One of these states is located on the sensor element of the transmitter of the signals and another on the receiver of the signals. This makes it possible to create devices for ensuring eternal life, which interact with thinking. In the patented inventions of Grigori Grabovoi it is written that human operator generates information in the form of the emission of thought. In order to activate the function of the device "PRK - 1U" a person concentrates emission of creative thought on the lenses located on the upper surface of the device.

Thought contains a goal of concentration. The action of concentration for the current and future time is made on the sensor element of the transmitter of signals consisting of lenses. Circular movements of concentrations starting from smaller diameter lens are carried out counter-clockwise above the lenses of a bigger diameter.

At concentrations related to the events of the past, the circular motion of the thought of concentration was performed clockwise starting from the smaller lens to the larger lens. And the ray of concentration in this case was not on the top, as in the case of concentrations for the current and future time, but from the inner optical assembly of the device.

In accordance with the system of transmission of information described in the patent, second quantum state of thought is projected onto the receiver of signals arranged in the form of optical device inside the device:

Realization of the method of normalization, during the concentration described in the patent "Method of prevention of catastrophes and device for its realization" is carried out through superposition of the bio-signal generated fields, electromagnetic fields. In addition to the factor of psychology according to the law of action of universal connections, a control of the goal of concentration is added.

The device universally works for the development of the following concentrations ensuring eternal life:

**Control 1:**

Development of eternal life concentrations for any event.

**Control 2:**

Development of eternal life concentrations for controlling clairvoyance

**Control 3:**

Development of eternal life concentrations for controlling forecasting.

**Control 4:**

Development of eternal life concentrations for rejuvenation.

The inventor of the device "PRK – 1U" is Grigori Petrovich Grabovoi

The producer of the device is Individual entrepreneur "GRIGORII GRABOVOI PR KONSALTING TECHNOLOGIES OF ETERNAL DEVELOPMENT" who operates on the basis of the certificate of state registration of individual Grigori Petrovich Grabovoi as an individual entrepreneur №63983276 issued on September 21. 2015 by the Agency for the registration of enterprises of the Republic of Serbia.

Time of the testing of the device:

Date: March 14th 2016

Time: 1756 - 1831 CET

**The methods of use of the device:**

Methods of use were the following: concentration on the goal of control 1, 2, 3, 4 is carried out within the time interval from 1 to 3 minutes and longer if necessary, with the device switched off and with the device switched on. The results are compared in terms of development effect of the concentrations ensuring eternal life. This effect is applied for the development of concentrations on specified controls through repeated use of the device.

Images of the device with the lenses located on the top surface of the instrument: to be seen through the video call of Skype. Switching the instrument was carried out on the reported willingness to perform tests in accordance with the test program.

Recommendations for concentrations during the testing of the device for development of concentration PRK-1U:

**Control 1:**

**Development of eternal life concentrations on any event.**

**Recommendation:**

At the beginning it is necessary to concentrate on localized part of the matter of one's own organism. Then such a concentration can be done for others. After that you can concentrate on any desired event.

**Control 2:**

**Development of eternal life concentrations on controlling clairvoyance.**

At the beginning it is necessary to apply controlling clairvoyance to see in the present moment room which you came from or where you have been few hours before. Then it is possible to apply controlling clairvoyance related to any event, preferable setting the goal of control which you need to have realised. During the observation of the event in the application of controlling clairvoyance concentrations it is possible, if necessary, to correct the event. That is because controlling clairvoyance differs from common clairvoyance in such a way that when applying controlling clairvoyance it contains, simultaneously with the observation of the event, also a correction of the event in order to ensure eternal life, if it is necessary.

**Control 3:**

**Development of eternal life concentrations on controlling forecasting.**

In controlling forecasting control there should be imbedded goal of control to, with the help of the device, develop consciousness and spirit to such a level that it is possible in perspective to practise without device, using development of spirit and consciousness only.

**Recommendation:**

It is possible, through development of concentrations for ensuring eternal life for all, to look into the more distant future. During the observation it is possible to immediately correct the event if necessary.

**Control 4:**

Development of eternal life concentrations on rejuvenation.

**Recommendation:**

You can concentrate on rejuvenation of yourself, then on rejuvenation of others. If you think that you are young and that you don't need rejuvenation now, then you need to practise concentrations for training. Then in the future, when you would want to rejuvenate yourself, you will already know how to do it.

During those concentrations it is possible to imagine desired age and during concentrations to sense it to the level of real perception of yourself in that age.

**The results of the use of the appliance:**

**Control 1:**

Development of eternal life concentrations for any event.

**Description of concentration before switching on the device:**

Control 1, 2 and 3 were moulded together, and were the second control. As I had already experienced concentration with the device in the first control, I did not experience like being totally without the control even when we started with it switched off. My body and my spirit continued the reactions experienced in the first control. Not as strongly as when the device was on, but still markedly. And concentration was easy and effortless. I was told to concentrate on my chest as the first step in the first part of this control, and then see my body as part of the next third part. This was the only alteration of the otherwise described control. The three controls included in this second one was flowing naturally, like my mind knew exactly what to concentrate on in each stage of the control. My sense of time disappeared. I felt no hurry or haste, but was taken by surprise when I was told to do the control again, this time with the device on.

Description of concentrations after switching on the device:

Immediately I felt the energy current – even stronger than before. The bodily reactions intensified. The pressure in my head extended to the root of my nose, and was strong. My body grew even warmer, especially the hands, with electric like currents going up my arms. My left hand, and especially the little finger and ring finger continually moved when the device was turned on. I felt my chest expanding and opening. And I saw my body from the outside, which I have not done before. I could actually move around and see it from the front, the back and the sides, I even tested seeing it from above – no problem. All this while keeping my eyes open and concentrating on the lenses of the PRK-1U in a counter clockwise motion. By mistake I started out with moving my eyes in a clockwise motion. Usually it would have stressed me to discover making such a mistake. But not so with the device on. I just corrected the movement, and did not loose concentration at all. It is like being in the energy field of a transformer, totally safe and being helped along. I felt joy during the testing, and have continued to feel joy. I am amazed at how much I was able to control during this exercise. And again, the concept of time did not exist.

---

---

---

---

Conclusion:

The device enhances the concentration in an unprecedented manner. It helps to create total focus, effortlessly and with joy.

**Control 2:**

Development of eternal life concentrations for controlling clairvoyance

Description of concentration before switching on the device:

---

---

**Control 3:**

Development of eternal life concentrations for controlling forecasting.

Description of concentration before switching on the device:

---

---

---

---

---

Description of concentrations after switching on the device:

---

Development of concentrations of eternal life for rejuvenation.

Description of concentration before switching on the device:

Control 4 was the first control. As usual I closed my eyes, and concentrated first on rejuvenation for myself, then for my friend, then for everyone and all animals. Rejuvenation of every cell and every atom to the norm of the Creator. Concentration came easily. I did not see with my inner vision, but I experienced feelings of being drawn to controls, as I usually do. It just feels like the right thing to do.

---

---

**Description of concentrations after switching on the device:**

The depth of concentration changed immediately, and continued to deepen during the testing. I felt a pressure (not painful, but distinct) in the middle of my head, spreading forward. Reactions in my chest – again - not painful, but like expansion. Warmth in my body, especially in my hands. It felt like sitting in an electric current, surrounded by an intense, expansive energy. The different reactions continued during the testing. Very easy to concentrate, even with eyes open and while describing my reactions I was deeply into the control. Smoothly and effortlessly.

**Conclusion:**

An awesome experience. It is clear to me that I want to use this device on a continuous basis, until I have developed enough to get into the same state without the assistance of the device. My conclusion is that using the device will speed up the spiritual development in ways very difficult to attain otherwise. Which means I can help humanity, animals and the world in a way former unavailable to me.

The general conclusion about the operability of the device on the development of the concentrations of eternal life:

I feel gifted and blessed to be here at this point in time, when the respected Dr. Grigorii Grabovoi are making this device available to us. It means so much that it is difficult to find the right words. Thank you for giving us this opportunity to really make a difference in the best way possible.
